- MDU – Data sourced from AISIP. Pending figure does not include legacy cases – the legacy data has been captured in such a way that it cannot be accurately reported on

International Protection: Interviews and Applications Processed

- Data sourced from Lotus Notes

International Protection Applications Processing Times

- Data sourced from Lotus Notes
- Applicants to whom section 38(5) of the International Protection Act 2015 applies (failure to co-operate) are included in the calculations
- Where an interview took place after a case was reactivated the reactivation date is used as the application date, otherwise the original application date was used for the processing time calculation
- The median calculation is used for processing time at IPO as there are significant outliers in the length of time asylum applications can spend in processing. This is typically due to lengthy procedures such as judicial reviews which are complex and time consuming by their nature, and which are also outside of the remit and control of the IPO during that part of the process. The median is a more accurate measure of the time spent by the IPO in processing applications.

Methodology

International Protection Decisions – Granted and Refused

- Quashed decisions and Revocation of Status are not included
- Decision figures include international protection decisions (IPDN) and legacy application types
- Each applicant is represented once in the granted and refused tables
 - For example, if a person is refused refugee status but is granted subsidiary protection they are recorded once in the tables as a subsidiary protection grant. This is to more clearly represent the overall numbers of granted and refused applicants, and to avoid double counting of individuals where they are refused one type of status but are granted another.
- Some of the applicants who have been granted permission to remain are also included in the 'Refuse All International Protection Statuses' category of the refusals table. Permission to remain is a humanitarian permission. In order to be considered for permission to remain you must first have been refused international protection. On slide 7, the 'International Protection Refusals Granted Permission to Remain on Humanitarian Grounds' chart is a combination of applicants still in the asylum process and applicants who have finished the process. The 'International Protection Refusals' chart includes only those applicants who have finished the asylum process.
- Where a revocation occurs the original grant is removed from the figures for the month the permission was originally granted. For example, if an application was granted in January but subsequently revoked later in the year the January figure is updated to remove the grant

Deportation Orders and Enforcement/Removals

- Data for the International Protection Deportation Order (IPDP) application type is sourced from AISIP. All other data is sourced from Lotus Notes
